TheraSeus

AI-powered gastroenterology workflow optimization platform

From 60-Minute Physician Burnout to 6-Minute Efficiency

Gastroenterologists waste **45-60 minutes per case** reviewing thousands of capsule endoscopy images.

TheraSeus delivers **up to 90% time reduction** while maintaining diagnostic accuracy.

Immediate ROI: $100/case investment saves $200-400/hour

- 40+ more procedures per physician per month
- Reduced physician burnout and turnover
- Same diagnostic accuracy, up to 10x faster workflow

The Workflow Crisis

- 45-60 minutes spent reviewing capsule endoscopy images per case
- 33% of gastroenterologists cite image review as primary burnout driver
- Days to weeks of delays for patient reports
- $200-400/hour physician time wasted on non-diagnostic images

The TheraSeus Solution

- Up to 90% time reduction - from 60 minutes to 6 minutes average reading time
- Intelligent prioritization automatically identifies key lesions
- Filters >85% of redundant images for streamlined review
- One-click structured reports for immediate patient care

Why TheraSeus Wins:

- First dedicated GI workflow optimization platform
- 18-month faster regulatory approval pathway
- Hardware-agnostic - works with all capsule systems
- Immediate physician productivity impact

Designed for Seamless Healthcare Integration:

100% Local Processing
NZ privacy compliance

Universal Compatibility
Works with all major capsule systems

Flexible Deployment
Cloud or on-premise options

Seamless Integration
PACS, EMR, and RIS integration

Advancing to Category II Medical Device Software

Streamlined regulatory pathway for workflow optimization

Transforming Healthcare Delivery

Physician Wellness
Reduce burnout, enable more time for patient care, improve work-life balance for gastroenterologists

Practice Economics
Improved physician productivity and retention, higher patient throughput, reduced operational costs

Patient Outcomes
Faster diagnosis, reduced wait times, earlier intervention, improved access to specialized care
